

# Installing Color Files to the Mac OS X Color Picker

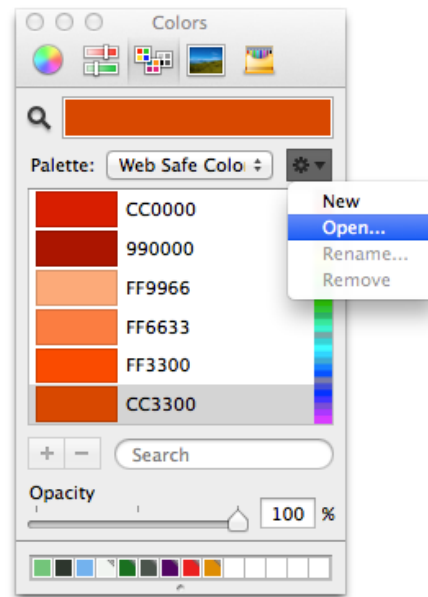

If you're in a Mac app that uses the standard OS X color picker (such as iWork or Microsoft Office), you can install the ESW color palette to make using our colors easier.

- 1) Open the picker. It's under "More Colors.." in Office, and can be opened using ⌘+Shift+C in Pages.

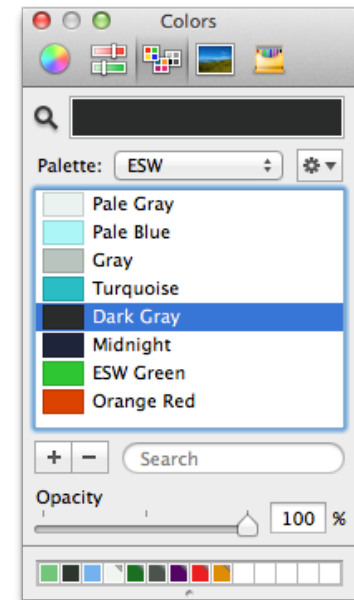

*"More Colors..." in Word 2008*

- 2) Select the middle "palettes" button and click the gear on the top right. Then click on "Open".

- 4) You're all set! You should see a color palette ready for use that looks like this:

- 3) Open the ESW.clr file. It's in the / Color Files directory in the Branding Guidelines folder.

## **Installing Color Files in Adobe Illustrator**

- 1) From your menu bar, click  
Window > Swatch Libraries >  
Other Library
- 2) Select the ESW.ai file in the Color  
Files directory in the Branding  
Guidelines folder.

## **Installing Color Files in Adobe Photoshop**

- 1) In the Swatches panel (which  
you can open from Window >  
Swatches), click the menu  
button.
- 2) Select the  
ESW\_Photoshop\_Swatches.aco  
file.
